Attn: To Whom This May Concern

Polar Medical supplied first aid personnel and equipment for us on the Wright Creek Highways project this summer. Their staff always conducted themselves in a professional manner. While on-site their first aid personnel conducted indoctrinations and well as regular morning safety talks. I can also state that their MTC's and equipment were always in excellent shape.

If you have any questions or would like further information, please reach me at the contact numbers below.

Sincerely

Blair Sampson
