

Medical Support and Camp Support Specialists

Polar Medical Services is a company committed to providing excellent Medical Support Staff. Our clinics are set-up for remote care in remote areas. We have the ability to do flu clinics and tetanus shots on-site with our in-house Nurse. The diversity of projects we work in require Advanced Care Paramedics to Occupational First Aid attendants. Additionally, Polar Medical works hand in hand with a team of doctors for 24/7 consultation.

Polar Medical Services began providing first aid and camp support services to the mining in 2005, and since then has branched out to other sectors. Senior Management has 9 years experience in the Oil and Gas industry.

Our client base includes companies involved in hydro electric, mining and mining exploration, construction, oil and gas, forestry, First Nations, and the BC Government (Ministries of Transportation and Infrastructure, BC Forest Service, BC Hydro).

We have worked throughout northern and Western Canada, specifically British Columbia, Alberta, Northwest Territories, Nunavut, and Yukon.

Polar Medical Services understands that key to our success is our qualified employees, for today and in the future. Our team is a close-knit,

professional and experienced group of individuals who pride themselves on providing excellent service.

Most medical employees with Polar Medical Services have an average of 10+ years experience. Polar Medical staff has training with TDG, H2S and WHMIS.

We also strongly believe in and actively integrate local people as part of the project. We take the extra time to support and train local hires so that they can be successful within the Polar Medical Services team.

Our current fleet is comprised of newer 4x4 F350 pickups outfitted with Mobile Treatment Centers (MTCs) as well as safety boxes containing emergency road equipment sufficient to handle most situations encountered, while traveling remote roads.

Our trucks are fully stocked with up-to-date equipment to First Aid Room standards. We are in full compliance with National Safety Code and WCB criteria for Mobile Treatment Centers.

We also provide a complete line of up-to-date communication equipment including mobile phones and radios, satellite phones and internet satellite systems.

Polar Medical Services Strengths:

- *Logistics and Pre-Planning*
- *On-going staff supports*
- *Integrating local hire with the project*
- *Advanced Care Paramedics*
- *Doctor oversight fully equipped medical clinic*
- *Full spectrum of medication*
- *Mobile Treatment Centres 4x4 industrial ambulances*
- *Training and Field Experience of the Polar Team*

Outstanding Safety Record

Polar Medical Services believes that the safety performance of our company is a key to your success. Polar Medical Services has an outstanding safety record since it began full operations in 2005. Polar Medical Services is in full compliance with IRP16 and all regulatory authorities.

Polar Medical Services has made its Safety Management System available on-line. The SMS tracks compliance for the various components of our safety program such as policies acknowledged, procedures reviewed, and training courses completed.

Our office is now located in Pritchard in central BC, however we maintain strong ties to Fort St. James and Terrace.
